About the Creator

Creator Jamie Slater, LPN & Certified CBD & Cannabis Health Coach, developed this formula to combat her own chronic pain.

When she realized how well it worked; there was no way she could keep it to herself.

We promise to keep it affordable so that everyone can benefit from DRUG FREE chronic pain relief.

How does it work? Who can use it?

Nurse Greenthumbs Magic Salve is formulated to work naturally with your endocannabinoid system. Your ECS is responsible for inflammation and pain signaling. When the cells are out of balance, you get mixed signals that cause chronic pain signaling.

Nurse Greenthumbs formula enters each cell and puts it into homeostasis and therefore signals to your brain to reduce inflammation & pain.

New world science meets old world natural remedies. It works so well because everyone has an ECS in their body that regulates their pain.

We have created Nurse Greenthumbs Magic Salve to be naturally 100% drug-free. **NO CBD / NO THC. 3rd Party Tested & Safe for all ages!**
